PROJECTS

LEUKAEMIA DIAGNOSE USING MACHINE LEARNING

This application for leukemia detection has shown promising results in terms of accuracy and efficiency
By utilizing a trained model on a dataset of leukemia images, it is possible to accurately classify image as either leukemia-positive or leukemia-negative

CAREERMATE USING DJANGO FRAME WORK

The objective of our project is to develop a platform that enables individuals to publish, remove, edit their articles, and also access articles written by others

IBM- Big Data analysis
